(b) if not, the action plan of Government to deal with it?

THE MINISTER OF STATE IN THE MINISTRY OF RAILWAYS (SHRI R. VELU): (a) and (b) Modern latest engines are expected to be deployed on certain selected sections only as per needs. However, even on such selected sections, the infrastructure *e.g.* Track, Bridges, Signals and Telecommunication etc., may need major upgradation, if full potential of these modern latest engines, is to be realized.

Such upgradation, is a costly activity and is normally planned and executed at a time when infrastructure replacement works are undertaken next. Such replacements are on age-cum-condition basis and their execution depends upon availability of funds. However, whenever such replacements are undertaken, modern infrastructure, as per route classification and annual traffic density etc. is adopted.

Till such time, required infrastructure is available, the rolling stocks, *e.g.* engines, wagons etc., including the modern latest engines, are allowed to be run at such maximum speeds and under such conditions, as are considered safe for the available infrastructure including track.
